

SR 1000S

A compact, productive sweeper for either indoor or outdoor use

- The SR 1000S makes sweeping simple

The remote vacuum option allows the operator to pick up light debris that lies in corners, on shelves or between stacked pallets. A telescopic wand is included for high reach vacuuming

A key option is the special carpet kit. This includes natural fibre main and side brushes, non-marking flaps and a pre-filter grid to catch the carpet fibres

The batteries have a running time of up to 2.5 hours and with the onboard charger, it can be recharged anywhere

A sweeping victory

Amazing manoeuvrability allows cleaning even in congested areas.

Sweeping needs to be done as quickly, as discreetly, and as efficiently as possible. Whether cleaning a workshop or warehouse floor, or sweeping a shopping mall or hotel parking lot, the job should be finished quickly and thoroughly.

The Nilfisk SR 1000S works fast, is small enough to fit into an elevator, manoeuvrable enough to reach the tight corners, comes in either a battery or petrol version for indoor or outdoor work and is durable to withstand tough working conditions.

What is more, with its amazing productivity the SR 1000S can cost less than manual or walk-behind sweeping.

- SR 1000S also cleans carpeted areas, using the optional carpet kit
- Improved dust control, better ramp climbing ability - up to 16% - and other top performance features
- High durability thanks to the polyethylene material
- Either battery or petrol driven versions for indoor or outdoor use
- Top safety features include emergency stop button, hood intralock switch and safety seat switch

The filter and brushes can be accessed quickly and easily without tools for service and replacement

The steering column adjusts for easy access to the machine and for maximum operator comfort

Reliability is also our mantra when it comes to service

A Nilfisk machine functions optimally when cared for by regular service and maintenance visits. Therefore we have created the optimal service solution: three levels of service reflecting different requirements and an optional supply of a substitute machine in critical situations.

Service Solutions Standard – Professional maintenance

Your contract encompasses two yearly maintenance visits and 48 hours response time. Breakdown visits and spare parts are billed separately.

Service Solutions Plus – Optimised performance

With the Plus solution you have a firm grip on your maintenance and repair costs while knowing that your performance is never compromised, only optimised.

Service Solutions Premium – Maximised uptime

If uptime is your absolute top priority and key concern, Service Solutions Premium is the best choice. A quarterly maintenance visit is included, and there are no sudden financial surprises.

Robust construction:
Metal chassis and
polyethylene hoods

Equipped with electrical filter
shaker for better filter cleaning

No tools needed to inspect
or replace brushes or filters

Fully adjustable seat and
steering column for better
ergonomy

Flap lifting device to collect
large debris

Two side brushes for a
wide sweeping path

Technical specifications
